THERE will be a meeting of the most prominent druggists in the State, at Nashville, on the 14th prox. to take into consideration the best means to secure the enactment of laws regulating the drug business in this State; to improve the art and science of pharmacy; suppress empiricism, and to gradually restrict the dispensing of medicines to educated pharmacists. This is certainly a subject worthy of our serious consideration. It would be an alarming state ment if the exact number of people, anawally killed by quack doctors and ignorant and inexperienced drug clerks, could be ascertained and published We are glad to learn that the College of Pharmacy is taking active steps in the

Hon. B. H. Hill, of Georgia, says: "It has always been a favorite purpose with me, at a proper time, when passion shall subside, to insist that we should make out a correct statement of every dollar taken from the people of Georgia by Pope, MEADE, RUGER and the BUL-LOCK government, and present it for payment by the United States. A CORRESPO"DENT opposes the propo-

sition to issue county bonds for the improvement of turnpikes and railroads in Maury county. He says the people are too poor and too much in debt. The people of Maury county are not poor, and are less in debt than the people of any county of its population and wealth in the State. Except the two counties in which the cities of Memphis and Nashville are situated, a higher valuation is put on Maury's real estate than that of any other county. Major AKIN, our Tax Collector for 1871 and 1872, was a dozen lots and farms for sale, to get his tax for 1872, while Collectors in other counties, of less wealth, had to sell a like our citizens are poor or much in debt. But, as for that matter, the bonds will not have to be paid in many years, and the annual interest on them will only be a few thousand dollars-but little, if any, more than is paid the occupant of a good fat office. It must be remembered that all these bonds will be expended in Maury county, and not only build roads, but also give our own people the benefit of almost every dollar disbursed.

An interesting debate took place in Congress a few weeks ago, on a proposition to increase the salaries of the Commissioner of Agriculture and his assistants; and another to increase the amount of money appropriated to seeds, etc., to distribute among the people Our Representative, Gen. WHITTHORNE,

I renew the amendment, for the purpose of calling the attention of gentlemen of the House to the fact that in the region of country which I and my friend from Guorgia represent there is now a demand for these seeds from a class of persons who are entering, so to speak, for the first time into the field of labor, to wi . the colored men. I do not know what my friend's experience is, but my own is that from that class of persons there is a growing demand for seeds, and in all that section of country there is not a more pressing demand for any action on the part of the Federal Government than for the distribution of agricultural reeds and agricultural information. And it is particularly to meet this demand, as we appreciate it in the southern section of the country, that I favor and I believe every other gentleman from that section of the country favors an increase of this appropriation. The appropriation for seeds was in-

creased from \$50,000 to \$80,000.

MR. J. W. KING, of Giles county, is in favor of a fence reform. He says scrub stock necessitates a good deal of dead capital, in the way of fences. Hear

Under the present law every farmer, to be secure from outside stock, has to be enclosed by a fence at least five feet high, and even then, the crops are not safe. Take Giles County, as an illustration, with her 354,777 acres or land, counting the land one half fenced, in forty-acro tarms. You see it will take 14,158,800 rails to enclose with a lawful fence, atan average of four cents each, 5557,552. There is a capital of that amount lying dead, and then, as every farmer an ws, it takes 1 per cent per annum to keep the fence up to nearly equal to the entire State, county and papers of the country for their bold deschool tax of the county. Now what do we rererub cattle and hogs, for all know that all the better class of stock are kept inside of enclos ures. No man is the county can afford to raise stock for profit and let it run at large. Now for the remedy. Let it be made a misdemeanor to let stock run at large. Then we will see our crops increasing, for the land will be improved by grasses and the droppings of stock. Or let neighborhood custom be the law; if a dozen or more neighbors conclude that a ceive in return for this heavy tax? A few poor three foot fence is high enough to secure a crop, let that be the cure, and the owners of the stock running at large be responsible for

Memphis is making great prepara ions for "Mardi Gras," on the 25th of the present month. Columbia should be represented by a large delegation of our pleasure loving people. Memphis is one of the most delightful places to visit this side of the Garden of Eden or the planet Venus, for the people are pleasant, and have a way of making everybody around them happy. Memphis is a great place. It has a great river, great buildings, great ideas, and great men from everywhere-but greatest of all are its women-its black-eyed, brown-eyed, heavenly-eyed, light hearted women. Capt. W. J. > THERE is a bill before the Tennessee Legislature, amending the statute on divorces, so as to allow no divorce except for adultery, the Biblical ground. Much can be said for and against this bill. We are rather inclined to favor it. The editor of the Brownsville States argues against it in his usually forcible style. He says:

"The married state is usually entered into during the years of inexperience, when the fancy with golden touch paints the object of youthful devotion with all the brightness of the springtime of life. Its colors are too vivid, and its loveliness too enchanting, and the dream too rapturous to per.nit the entrance of rude doubt or suspicion, or o allow the patient, stricken with love's delicious fever while smelling the swee lower, to gaze deep down in its cup and shold the serpent lurking there.

Shall she be forced to lle down and make her bed with rotten-ness and death, and have no escape offered her except shame and dishonor "It is hard enough as it is, when the women of our land are often tied by di vorce laws into companionship with oarse and soulless Drunkards, Gamolers, Swindlers, Thieves, Cowards, Scoundrels, Pimps, Ignoramuses, Syco-phants, Toadies, Dirt-caters, Lius, Cutbroats, and wretches of every descrip ion. Good Advice To Farmers. To the Editor of the Independent

February is a very suitable month to for grasses. Land prepared for Blue and Or chard grass and C over, should have one bushe per acre of the two first and 1% gallons of the latter. All meadows should be seeded in October-by so doing a stand is invariably ob-tained, while if you put it off until Spring the charces are five to one against a good stand.

No land on a farm pays like a good meadow.

The yield should be from 1½ to 2 tons per acre, worth say from \$22 to \$25 per ton. My experience is that the grazing is worth the reat of the land—hence you get the hay merely for the templated stands. for the trouble of saving it. Grass is the cheapest of all animal food that nature gives us. Relying upon the corn crib is an obsolete and they are just the men to take charge of a nice party of Columbia ladies.

It is a matter f economy to shelter stock, to say nothing of the obligations which humanity imposes upon us. Arrange good troughs, racks and man-gers in order that your stock may have the benefit of what you give them; ordinarily from one-third to one half is wasted on account of our farmers neglecting to do this. Let the rule by which the stock raiser shapes his policy be-"keep no more stock than you can

Quit losfling around towns and villages; go to work with a will. Make home attractive and keep your boys there; (too many of them are already in the towns) make them produce something and not be consumers alone and then we will not hear so much twaddle about "hard times." AGUE AND FEVER,

The proprietor of this celebrated medicine ustly claims for it a superiority over all remidies over offered to the public for the safe, certain, speedy and permanent cure of Ague and Fever, ar Chills and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion, that in the case whatever will it fail to cure if the difference whatever will it fail to cure if the difference will be care if the difference will be care in the difference of the cure if the difference of the cure is the cure if the difference of the cure is the cure of the cure o case whwever will it fall to cure if the di-ections are strictly followed and carried at in a great many cases a single dose has Lensufficient for a cure, and whole families have been cured by a single bettle, with a perfect restoration of the general health. It is, how ever, prudent, and in every case more certain to cure, if its use is continued in smaller doses

SARSAPARILLA.
